Re: **Use of Natures Ultimate on Wabamun Spill Clean-up**

Dear Cheryl:

As a project supervisor for HAZCO Environmental Services on the Wabamun spill clean-up, I was in charge of removal and cleaning of all residential boats, docks and piers from the water. I just wanted to thank you for the service and product you provided during the Wabamun spill clean-up. Natures Ultimate and CL 7000 were the products of choice to clean spill residue from the residential sailboats and pleasure craft, as well as workboats and reed harvesters working on the water. We happened to discover your product worked amazingly well at lifting and removing the spill residue from concrete and after that we used it to clean all the residential docks and piers.

Your product worked the most efficiently and effectively at cleaning the above mentioned items. Because your product is organic, environmentally friendly and biodegradable our crews were able to work without gloves or a respirator.

Thank you for your attention to detail and your commitment to providing excellent customer service. Your company contributed to our success of a timely and efficient clean-up in Wabamun.

Best Regards,

A handwritten signature in blue ink, appearing to read "RMBertram".
