RE: NuSolvent

Ms. Vroom,

We would like to thank you for introducing us to your NuSolvent and share some of our thoughts about this product. As you know, SafetyBOSS is a world-class oil services company and we used your product for our oil, gas, and petrochemical vessel cleaning & safeing operations. Our new Environmental Division heard of NuSolvent through both you and others in the fields that were using your product.

Over the years our Environmental Division has evaluated many new types of cleaners, solvents and degreasers but has not found anything that can outperform NuSolvent in terms of environmental, cost savings, and cleaning efficiency (performance, time). This is truly the best product we have ever used. We have clients who are quite happy at how quickly their vessels are cleaned and are able to be inspected and put back into service due to NuSolvent.

Our field staff specifically used your NuSolvent product on a hydraulic tank to clean embedded hydrocarbons off of the steel. They were amazed at how easy it was to use, and how quick the cleaning process took. This tank cleaning using sand blasting would have normally taken 2-3 days and with NuSolvent it took less than an hour.

We are also very pleased that the product is non-corrosive, 100% biodegradable, environmentally friendly and contains no nonyl phenols. This is therefore, a product that our environmental division feels safe and happy about using.

In conclusion, we can state with full confidence that no other product we've used can clean vessels as effectively and safely as does NuSolvent. It is therefore our choice to continue to use the NuSolvent product line for our innovative vessel cleaning operations.

Best regards
